- Specialty Gardens
- Seasonal Color & Interest

### September To-Do List:

- Order autumn annuals
- Order spring bulbs for fall planting
- Renovate, fertilize and repair lawn
- Do NOT fertilize trees or shrubs
- Selectively prune now
- Divide and transplant early blooming perennials
- Change irrigation to your fall watering schedule

### Ogdenwords:

**Deciduous:** trees and bushes that shed their leaves in the fall.

**Loam:** fertile soil consisting of a mix of clay, sand and silt and rich in humus.

**Understorey:** a ground cover of shrubs often found underneath the tree canopy in deciduous woodland.

Have you ever felt that your garden interest dwindles in the fall? Well, there's no need to have that happen when you can select plants that have berries for fall and winter interest.

Viburnums are a wonderful option.

The selection to choose from is enormous, with a wide range of size, shape and form.

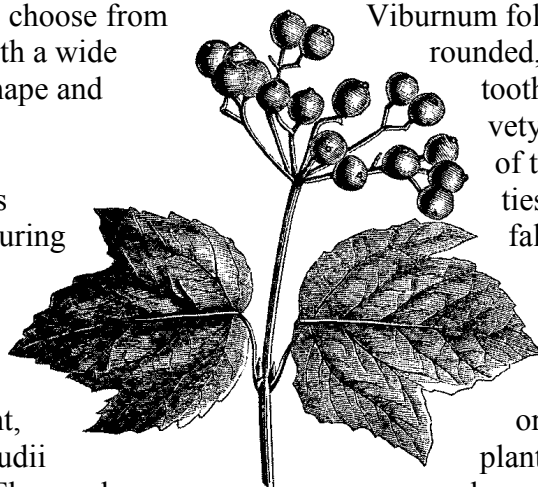

Most viburnums tend to bloom during the spring with white or pink blossoms.

Some flowers are even fragrant, like *carelessii*, *judii* or 'Mohawk'. Flower shapes are either lacecap or mophead, similar to hydrangeas. 'Summer Snowflake' is rather upright in habit, with white lacecaps that bloom throughout the entire summer.

As flowers fade, fruit develops which can vary in color from yellow to orange, red, blue or black

(depending on the variety), attracting birds and other wildlife. Ideally you should prune right after flowering to ensure blooms for the following year.

Viburnum foliage can be rounded, lance-shaped or toothed; smooth, velvety or rough. Many of the deciduous varieties have outstanding fall leaf color.

Viburnums are great grown in the shrub border or as an understorey plant for woodland gardens. They do well in any moderately loamy, well-drained soil in full sun or partial shade. They also have great insect resistance and are low maintenance.

There are more than 150 varieties of viburnum so if you need help to select the perfect one for your garden please call us.

### Fall into Color!

Ogden's can help you create a garden full of seasonal interest.

We have a wide selection of plantings in our private nursery to bring color and interest into your gardens!
